limitless expanding finite of the material universe
.and its teeming determinations, the enigma remains
the same. Infinite existence, infinite non-being or
boundless finite, all are to us original indeterminates
•or indeterminables; we can assign to them no
•distinct characters or features, nothing which would
predetermine their determinations. To describe
the fundamental character of the universe as Space
•or Time or Space-Time does not help us; for even
if these are not abstractions, of our intelligence
which we impose by our mental view on the cosmos,
the mind's necessary perspective of its picture, these
too are indeterminates and carry in themselves no
•clue to the origin of the determinations that take
place in them; there is, still no explanation of the
strange process by which things are determined or
•of their powers, qualities and properties, no revela-
tion of their true nature, origin and significance.

Actually to our Science this infinite or indeter-
minate Existence reveals itself as an Energy, known
not by itself but by its works, which throws up in
its motion waves of energism and in them a multi-
tude of infinitesimals; these, grouping themselves
to form larger infinitesimals, become a

basis for all
the creations of the Energy, even those farthest
away from the material basis, for the emergence of
a world of organised Matter, for the emergence of
Life, for the emergence of Consciousness, for all the
still unexplained activities of evolutionary Nature.
On the original process are erected a multitude of
processes which we can observe, follow, can take
